

CHAMBAL FERTILISERS AND CHEMICALS LIMITED

Sustainability Policy

Chambal Fertilisers and Chemicals Limited ("Chambal") strives to incorporate economic, social and environment aspects into the core of its processes and follow sustainable practices and processes that are safe, efficient and environment friendly to the society.

In pursuit of this policy, Chambal is committed to:

- (i) Work towards optimal and responsible usage of resources over the life cycle of its products and services, following the principle of Reduce, Re-use and Re-cycle, wherever possible and diligently manage water and waste across all its operations.
- (ii) Work towards ensuring that its value chain partners such as suppliers of goods and services, customers, consumers and re-cyclers are made aware of their responsibility towards sustainability and environment protection.
- (iii) Pro-actively persuade and support its value chain to adopt the principles of sustainability of resources and environment protection.
- (iv) Strive to ensure, while designing its products, that the manufacturing processes and technologies required to produce it are resource efficient and environment friendly.
- (v) Progressively review and improve its processes by adopting new technologies with appropriate consideration to the social, ethical and environmental factors.
- (vi) Seek to improve its environmental performance by adopting cleaner production processes, promoting energy efficiency, environment friendly technologies and use of renewable energy.
- (vii) Recognize and respect the rights of people who may be owners of traditional knowledge and other forms of intellectual property.
- (viii) Promote sustainable consumption of resources including balanced use of agri-inputs to achieve optimal farm productivity.
- (ix) Understand the impact of its operations on social and economic development and respond through appropriate actions to minimise the negative impacts.
