

BHARAT NPK

(12:32:16 and 10:26:26)

Features of Bharat NPK 12:32:16

- Bharat NPK 12:32:16 fertilizer is used as a combined fertilizer to supply all three major nutrients like nitrogen, phosphorus and potash. It contains 12% nitrogen, 32% phosphorus and 16% potassium.
- Bharat NPK 12:32:16 fertilizer is an ideal combined fertilizer for crops which require high phosphate during the initial stages of plant growth.
- Leguminous crops like soybean, peas and other pulse crops have less requirement of nitrogen element, in such situation use of this fertilizer is more beneficial.

Features of Bharat NPK 10:26:26

- Bharat NPK 10:26:26 fertilizer is a combination fertilizer containing all the major nutrients Nitrogen, Phosphorus and Potassium.
- Bharat NPK 10:26:26 fertilizer contains phosphorus and potassium nutrients in the ratio of 1:1.
- Bharat NPK 10:26:26 fertilizer is especially valuable for crops that require large amounts of phosphorus and potassium available in the soil.
- Bharat NPK 10:26:26 fertilizer contains phosphorus which is water soluble.
- Bharat NPK 10:26:26 fertilizer is ideally suited for crops having high phosphate and potassium requirement.
- Bharat NPK 10:26:26 fertilizer helps in increasing the quality and yield of crops.
- Bharat NPK 10:26:26 fertilizer is also suitable for fruit crops.
