

## BHARAT NPKS

(15:15:15:09)

Bharat NPKS 15:15:15:09 contains 15% Nitrogen, 15% Phosphorus, 15% Potassium and 9% Sulphur, making this fertilizer ideal for vegetative growth of various crops, vegetables and garden plants. Bharat NPKS is a mixture of potash grade and ammonium phosphate sulphate in 1:1:1 ratio. Contains nitrogen in the form of ammonia and urea, which prevents leaching losses thereby improving nitrogen use efficiency. It contains 13% water soluble P<sub>2</sub>O<sub>5</sub> out of 15% phosphorus, 15% potassium and 9% sulphur.

### Uses and Benefits:

- It can be recommended for all crops including those having high nitrate requirement, because under upper conditions, NH<sub>4</sub> form can be easily oxidised to NO<sub>3</sub> form of N.
- Highly suitable for paddy crop.
- The source of nitrogen is both ammonia and urea, so it is suitable for long duration crops like coffee, tea, betel nut and other plantation crops.
- It contains sulphur, which is suitable for sulphur demanding crops like pulses and oilseeds and improves yield and quality.
